# RETRACTED: INNOVATIVE POLYMER MATERIALS ï IDENTIFYING THE PROBLEM IN A SOCIOLOGICAL SURVEY

**Abstract:** This article (DOI 10.15826/rjcst.2022.1.004), published in Volume 8, No. 1 for 2022, has been retracted by the joint decision of the Editor-in-chief and the journal's Ethics Committee. The reason is the fact that this article violates the ethical norms of scientific publications ï it uses borrowing without reference to the source (https://www.ftorpolymer.ru/docs/plenki-iz-innovacionnogo-ftoroplasta-40-ili-etfe.pdf).
The Editorial board of the Russian Journal of Construction Science and Technology takes a very strong view on this matter and apologies are offered to the readers and authors of the borrowed text ï P. S. Zakharov and M. V. Zakharova, ONPO Plastpolymer, St. Petersburg, due to the fact that this fact was not noticed earlier at the stage of reviewing the manuscript.
