

CONTENTS

Bakirov M.F., Sukhanov E.V. The Thue–Morse words and the \mathcal{D} -structure of the free Burnside semigroup	5
Berdyshev S.V. A finite-difference approximation of the differentiation operator ..	19
Vernikov B.M., Volkov M.V. The structure of lattices of nilsemigroup varieties	34
Grebenshchikov B.G., Onegova O.V. Investigating oscillations of the pantograph of a driving locomotive caused by its interaction with the contact wire near a support	53
Dolgii Yu.F., Tarasyan V.S. Finite-dimensional monodromy operators for periodic systems of differential equations with aftereffect	67
Korotkii A.I., Tsepelev I.A., Ismail-Zadeh A.T., Naimark B.M. Parallel algorithms for simulation of heat convection of a viscous fluid	84
Kremlev A.G. Constructing information sets for singularly perturbed systems	96
Lukoyanov N.Yu. On generalizations of the Hamilton–Jacobi equation for hereditary systems	109
Ovsyannikov A.J. Projectivities of completely simple semigroups	131
Pimenov V.G. Positional control problems for systems in the class of generalized controls with delay	140
Popov V.Yu. On the equational theories of semigroup varieties	162
Struzhanov V.V., Zhizherin S.V. On the stability of the process of tension and torsion of a rod model	176
Fedotov V.P., Spevak L.F. A variational method of separation of variables for plastic impact problems	185

History

Shevrin L.N. First years of the Sverdlovsk algebraic school	197
--	-----

Scientific life

Arestov V.V., Berdyshev V.I., Subbotin Yu.N. The International Conference «Approximation theory for function and operators» devoted to S.B.Stechkin's 80th birthday	214
Meetings of the seminar «Algebraic systems»	216
