METHODS AND DEVICES OF ANALYTICAL CHEMISTRY AND ANALYTICAL CONTROL

Results accuracy of the simultaneous Na, K, Li, Rb and Cs determination in geochemical objects using the Flame Atomic Emission Spectrometry <i>Anna A. Zak, Elena V. Shabanova, Irina E. Vasil'eva</i>	6
Comparative analysis of X-ray fluorescence methods for elemental composition determination of the archaeological ceramics from low sample quantity <i>G.V. Pashkova, M.M. Mukhamedova, V.M. Chubarov, A.S. Maltsev, A.A. Amosova, E.I. Demonterova, E.A. Mikheeva, D.L. Shergin, V.A. Pellinen, A.V. Teten'kin</i>	20
Identification of unknown compound extracted from the hair of exhumed human remains using Mass Spectrometric and Gas Chromatographic data <i>Sergei A. Savchuk, Igor G. Zenkevich</i>	34
Determination of O-isobutyl-S-[(2-diethylamino)ethyl]-methyl phosphonothioate and the hydrolysis toxic product traces by liquid chromatography-tandem mass-spectrometry <i>E.I. Savelieva, M.A. Leninskiy, *I.A. Vasileva, G.V. Karakashev, N.A. Samchenko</i>	43
Determination of polymeric functional additives in diesel fuel by gel penetration chromatography <i>Yu.A. Ivanova, Z.A. Temerdashev, I.A. Kolychev, N.V. Kiseleva</i>	53
